

CroxX stabil

stabil 21

Worldwide established Stabilized N-Fertilizer for Nitrogen nutrition in Fertigation systems.

The high NH_4 content ensures maximum efficiency of DMPP.

Ammonium Fertilization enhances root formation and reduces pH in the rhizosphere/root zone. This significantly improves the mobilization and uptake of Phosphorus and Micronutrients

For Fertigation

Content (% w/w): 21.0 N / 60.0 SO_3

Bulk density (g/l): 900-1.200 / **pH:** 3.5-5.0 / **Average granule size (mm):** 0.2-0

Benefits

- ✓ 100% water soluble
- ✓ Ammonium nutrition
- ✓ Sulphur content (60% SO_3)

Packing: 25 kg and Big Bag
